Subject: The Non-VAP Work Plan Items
Date: Monday, March 25, 2013 3:14:23 PM

Ron and Steve:

Should we have also discussed the other work plan (the sand filters, David Abdoo's property, etc.)? We have some information on how the old sand filters were back-flushed (onto the ground), so while the property owner is fine with testing the sand filter media, he also has a concern about whether or not some materials got back-flushed onto the soil around/beneath the old sand filters. This extends to the new filters in the shed. According to Jonathan, there were instructions in the shed indicating how these filters were to be back-flushed (also on the ground immediately adjacent to the shed). I don't know if we need a second call so much as an email exchange to make sure that we are in accord on how to deal with the second work plan.

Matt
